# SCS - SAFETY CONTROL SYSTEM

## The benefits:

- 3-coloured inserts create a clear structure and protect the quality tools from damage or loss.
- Safety foam inserts with high precision, 3D CNC parts.
- the red signal colour is for completeness checks - a visible red colour means a tool is missing.
- Completely flexible thanks to individual combinations
- no tools confused with each other
- perfect tool organisation
- Tailored inserts in each workshop tool cabinet
- oil resistant
- easy to clean

## MODULAR BUILDING BLOCK SYSTEM

### Best flexibility and organisation

#### create "your own" tool cabinet....

With our unique system inlay configuration you can design your tool cabinet to your exact requirements.

Due to our user friendly foam inlays, you can simply configure each drawer by category (tool type) with a neat and tidy presentation.

It is ideal when you want to work away from your tool cabinet as you can take each inlay individually, meaning you have the right tool for the job.

### COMPLETELY FLEXIBLE

For each individual tool, the 3D CNC computer technology mills a tailored part.

The tailored parts mean a quick glance is all that's needed to know where the corresponding tool belongs. **This saves a lot of time.**

Thanks to the finely detailed characters, the size of the tool can be seen before removing it.

Three-layer three-colour system: the top layer is black, the middle layer is white and the bottom layer is red.

The foam inserts are oil-resistant, extremely flexible and easy to wash.

The right combination:
