## RATCHETING SPANNERS

### "DOUBLE" RATCHET SPANNERS

A new concept for fast working where you can't use a ring spanner. The spanners have the ratcheting ring end as Item No.s 1-6 on page 54 but now with the addition of a unique and patented ratcheting mechanism in the open end - see illustrations.

Simply place on fastener and rotate to "ratchet" the spanner. The sprung pin automatically retracts, then locks into place on the next flat - ready to tighten or loosen the fixing. The added benefit of these spanners is that there is a high quality ratcheting ring end so similar hard-to-get-at fixings can be loosened.

### DAVE SAYS

These versatile tools are extremely useful for working in confined spaces, for instance under the bonnet where space is tight, especially in today's hi-tech vehicle engines.

The ratchet action requires just 5° movement to turn each fastener. Some sets are available with a reverse mechanism.

STOCKIST INFO

ITEMS 2, 4 & 6  
ON THIS PAGE

Only 5° movement required to turn fastener.

180° movement.

### DAVE SAYS

QUALITY MAKES THE DIFFERENCE

If space is even more at a premium then the flexible head version is more than ideal. The head pivots through 180° to gain access to even tighter locations.

3 8228RMMB

### Draper Expert HI-TORQ® Metric Ratcheting Combination Spanners

**Expert Quality**, open end set at 15°. Draper Expert HI-TORQ® ratchet ring end offset at 15°. With forward/reverse direction changer on ring end - only 5° movement required to turn fastener, especially useful in confined spaces. Special stop cap in ring end ensures wrench does not slip past fixing. Forged from chrome vanadium steel, hardened, tempered, chrome plated and fully polished throughout. Display packed.

## DAVE SAYS

WHAT IS DRAPER EXPERT HI-TORQ? - "Draper Expert HI-TORQ" spanners grip on the flats of the fastener - not the corners. This gives more grip - therefore more torque can be transmitted to the nut or bolt. It also prevents damaging the corners by spreading the load on the flats not the corners.

Contact point on  
Standard Bi-  
hexagon spanners

### DAVE SAYS

#### OBSTRUCTION RING SPANNERS

Item Nos. 4, 5 and 6 show a selection of obstruction ring spanners. As their name implies, this type of spanner is ideal for working in areas where there is difficulty accessing specific fastenings. I would definitely recommend that a set of either Half Moon or S-Type obstruction spanners are kept in the tool box for such eventualities.
