1/4" SQ. DR. SOCKET SETS

WHY USE DRAPER SOCKET SETS AND SOCKETS?

Our range of Socket Sets, Sockets and accessories are designed for use in professional automotive workshops, on agricultural machinery and for other industrial applications. They are manufactured and tested to the very highest standards to ensure they don't let you down.

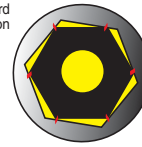

The text below explains some of the great features of these products...

"Draper Expert HI-TORQ"
6 point

DRAPER EXPERT HI-TORQ 6 POINT

The specially engineered, six point wide-rib driving faces allow this style of socket to fit onto and securely grip even badly damaged fixings, making sure the sockets will work when others cannot. It will also help prevent any further damage, by only gripping the sides, not the corners of the fixings.

Standard
Bi-hexagon

HI-TORQ
6 Point

"Draper Expert HI-TORQ"
12 point

DRAPER EXPERT HI-TORQ 12 POINT

Our 12 point sockets drive on the flats of the fixings - NOT the corners, allowing high torque to be applied without damaging the corners of the fixings. The double hexagon 12 point design makes it easy to locate the socket onto the fixing.

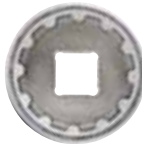

Standard
Bi-hexagon

DAVE SAYS

The specially engineered, six point wide-rib driving faces allow this style of socket to fit onto and securely grip even badly damaged fixings, making sure the sockets will work when others cannot. It will also help prevent any further damage, by only gripping the sides, not the corners of the fixings.

The remedy is to avoid the problem in the first place and use a "Draper Expert HI-TORQ" socket initially!

"Draper Expert HI-TORQ"
12 point

DAVE SAYS

Our 12 point sockets drive on the flats of the fixings - NOT the corners, allowing high torque to be applied without damaging the corners of the fixings.

The double hexagon 12 point design makes it easy to locate the socket onto the fixing.

DAVE SAYS

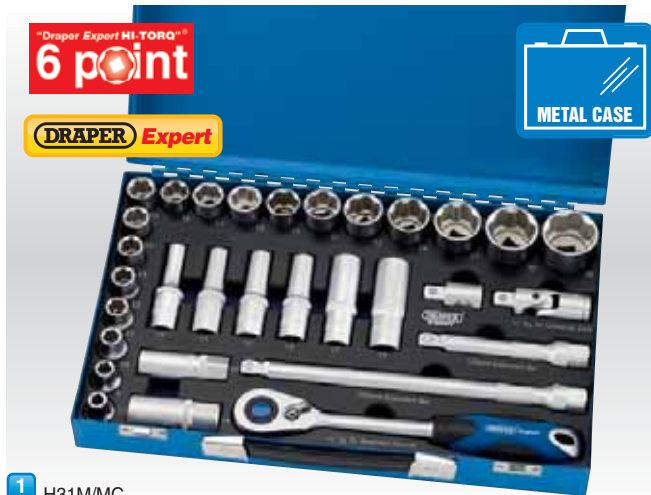

QUALITY MAKES THE DIFFERENCE

DRAPER EXPERT VORTEX SOCKETRY

Reduced by 30% plus

Slim profile design, overall, height is reduced by as much as 50%, width by 20%

The unique hollow socket technology of the Draper Expert VORTEX ratchet and sockets is ideal for long fixings. The sockets are edge driven. This allows a fixing to pass through the head and avoid the depth restriction of conventional sockets and ratchets.

The vortex sockets thin wall and arch design can increase driving torque by up to 40%

DAVE SAYS WOBBLE EXTENSION BARS -

Wobble extension bars are very useful in locations where access to the work area is obstructed or difficult. The wobble extension bar is fitted into the accessory e.g. a socket, and the user can turn it at an offset angle of up to 15° - see illustration.

FLEXIBLE HANDLES -

Any claims for replacement of flexible handles must be returned WITH THE TOOL to Draper Tools for inspection, prior to replacement. Test figures show 98% are broken by abuse, and on test 99.9% of the returned flexible handles exceed the BS test by three times. ALSO These products must NOT be used with an extension bar of any length. If used in this way it can cause undue stress on the joint between the extension bar and flexible handle.

PAUL SAYS
QUALITY ASSURANCE MAKES THE DIFFERENCE

7 B52
1/4" Sq. Dr. Sliding Tee Bar
(display packed)

Manufactured and tested generally in accordance with DIN3122 and ISO3315 Specifications **Expert Quality**, manufactured from chrome vanadium steel hardened, tempered, chrome plated and polished for corrosion protection. Spring-loaded ball bearing for secure socket holding. Display packed.

DAVE SAYS

This nut and bolt remover set is ideal for those rusted and 'hard-to-get-off' fixings. The reverse flutes in each head engage the fixing and by applying strength it can be removed. The ideal "get out of jail free" set to have in your collection.

QUALITY MAKES THE DIFFERENCE

FLEXIBLE HANDLES -

Any claims for replacement of flexible handles must be returned WITH THE TOOL to Draper Tools for inspection, prior to replacement. Test figures show 98% are broken by abuse, and on test 99.9% of the returned flexible handles exceed the BS test by three times. ALSO These products must NOT be used with an extension bar of any length. If used in this way it can cause undue stress on the joint between the extension bar and flexible handle.

MANY NEW FLEXIBLE HANDLES ADDED!

Please see pages 39 and 43 for our new range of flexible handles...

FLEXIBLE HANDLES -

Any claims for replacement of flexible handles must be returned WITH THE TOOL to Draper Tools for inspection, prior to replacement. Test figures show 98% are broken by abuse, and on test 99.9% of the returned flexible handles exceed the BS test by three times. ALSO These products must NOT be used with an extension bar of any length. If used in this way it can cause undue stress on the joint between the extension bar and flexible handle.

E.V.A.
TOOL CONTROL SYSTEM

DAVE SAYS - MODULAR TOOL CONTROL SYSTEM

QUALITY MAKES THE
DIFFERENCE

These high quality tool control trays are designed for use in professional workshops. They use top grade aerospace quality "closed cell" EVA foam which means they will not absorb liquids. Each tool control foam insert is fully

resistant to normal workshop fluids - eg. oil, fuels, brake fluid, etc. and will not become tacky or sticky as some cheaper foam does. When dirty, it can even be easily cleaned by using a normal workshop pressure cleaner! Precision cut by CNC machinery, each cavity is purpose designed for each product to ensure a perfect fit. Make your workplace neater, tidier and more professional with this system.

DAVE SAYS - TOOL MANAGEMENT SYSTEM

Help avoid F.O.D. (foreign object damage) by using these high quality EVA inserts. The dual colour black top and vivid blue base makes it possible to instantly recognise if all tools have been returned after use. This is an essential requirement in the aerospace industry - and a good way of preventing damage by items being left behind in the automotive, aerospace and maintenance/repair industries.

The Draper Expert Quality Range of automotive socketry covers most automotive vehicle applications as shown in the tables below.

Contact the Draper Sales Desk on +44 (0)23 8049 4333 if your particular vehicle application is not shown.

Specialist Automotive Sockets

Expert Quality selection of specialist automotive sockets suitable for a variety of maintenance tasks on cars or light commercial vehicles. Each socket is manufactured from Chrome Vanadium or Molybdenum, as appropriate for the designed task. While every effort has been made to ensure the information is correct always refer to the user manual for confirmation of the socket required.
